Palladiom keypads

Distinctly crafted. Precisely engineered. Those are the hallmarks of our uniquely luxurious Palladiom keypads.

The deliberate, uniplanar design embodies a single material for the faceplate and button interface, for a clean, minimalist look. Together with backlit engraving and dynamic backlighting, these sleek, beautiful keypads deliver an exceptional solution for thoughtfully considered spaces.

Special notes on ganging, finishes, and faceplates:

- Palladiom keypads can only be ganged with other Palladiom keypads or New Architectural accessories. Ganging is only available for U.S.-style keypads/accessories.
- Order multi-gang faceplates separately. Order base unit with or without engraving credit in matching finish.
- 4B and 3BRL button configurations are field interchangeable. All other button configurations require replacing the base unit.
- Glass faceplates are only interchangeable with other glass faceplates. Metal faceplates are interchangeable with plastic faceplates.

Colour samples shown are representations only. See product samples for exact finishes.

Backlit text

Backlit buttons

For metal faceplates

LFK - _____ - _____ - __
model colour engraving

- If a metal faceplate is desired, purchase a midnight (MN) tabletop keypad and a separate metal faceplate.
- Omit the "-E" unless engraving on the faceplate is desired.

Example:
LFK-T10RL-SN

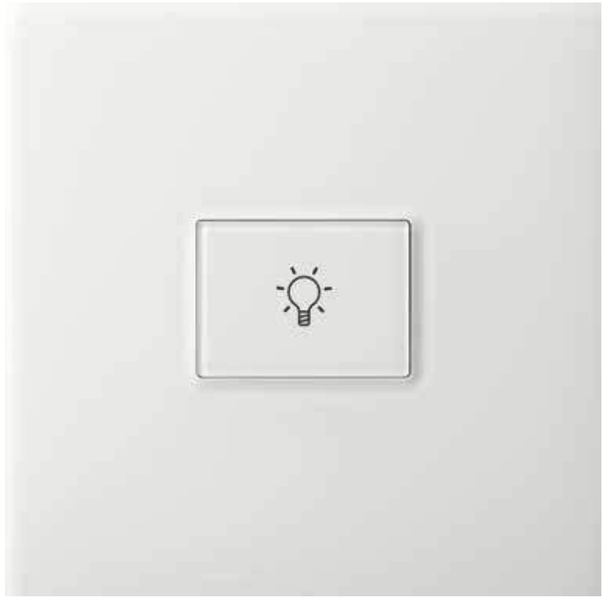

Custom Controls

Controls that perfectly match your design

Lutron controls have always been well known for their beautiful aesthetic, intuitive nature, and variety of standard choices. We also understand that standard options do not always fit the bill. For projects that require specific design elements, or an exceptionally high degree of detail, we can help you create a unique control for each and every space:

- create exactly the right look for a space
- customize functionality to suit your client's needs
- enhance the interactive experience for occupants by providing unique, intuitive controls

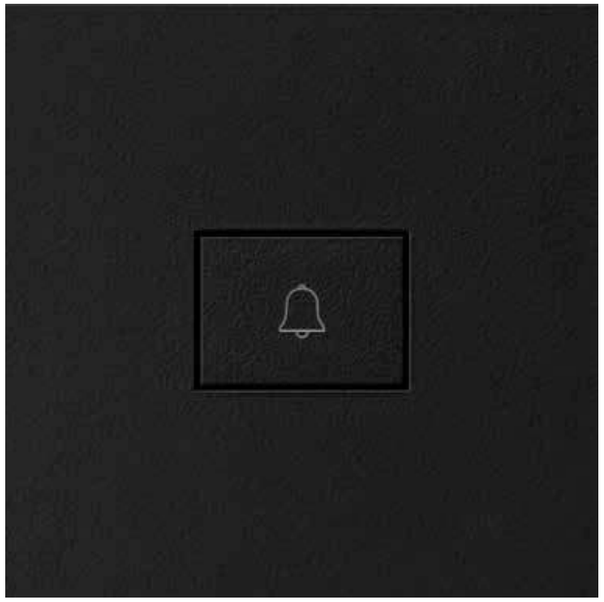

Palladiom Single Button Keypad

Option 1: Choose an existing custom design

Review options at **www.lutron.com/CustomControls**, then contact our customer service team for additional options. Consider customizing certain elements, such as colour, finish, and engraving.

Option 2: Create a new custom design

Send us a sketch or mark-up of an image of an existing Lutron control, then contact our customer service team to start a conversation. We will work with you on the design parameters and feasibility.

Custom Engraving

Add personalized engraving to any control

As a finishing touch, you can add custom engraving. Text, icons, and images are all possible.

Icons and images

The following icons are a sample of our laser-engraving capabilities and are offered in either dark grey or white text. These icons appear on engraving sheets as a sample of options for custom engraving.*

Fonts and languages

The engraved font can be changed from the standard Helvetica to nearly any font, including characters from any language.

Engraving guidelines

For images and icons, files must be provided in .dxf or high-res .pdf format. In some cases, images and icons may need to be resized to fit appropriately on a button or faceplate.

For custom fonts, you can provide true-type font files or request a font by name.

Engraving available in dark gray or white text

*Palladiom keypads support a limited set of engraving icons and languages. Review spec sheet at www.lutron.com for more details.
