CONSTRUCTION DETAILS

Flat pack design allows for easier transport and assembly without risk of damage vs other fully extruded Aluminium products.

Can be easily cut to size on site while flat and assembled easily with supplied fixings using standard hand tools.

MDF and Metal end plates available, depending on installation type. Two 20mm pre cut cable routing holes in top corners for easy routing of power cables to shades.
OTHER END PLATE OPTIONS AVAILABLE

MDF Plaster Ends for use with MDF end plates to provide seamless installation into plastered ceiling without need for mitring.

UCH Toolless Twist In Mount Bracket Rail provides quick and easy installation method for shade brackets without overhead drilling or mess.

Brackets available that are compatible with Somfy, Crestron, Nice, QMotion, Lutron and Silent Gliss.

Custom Brackets service can be provided on request.

UCH Horizontal and Vertical Skim Trim provides plaster skim edge detail as well as dual position hook on flap in one product allowing for a quick way to create a seamless finish from ceiling to pocket. Flush trim allows for UniChannel to be used against flat surfaces i.e Windows / Doors

Fixings from below through Aluminium Horizontal Skim Slotted holes allow for perfect alignment to ceiling without need for removing and realigning. Combination of Aluminium and MDF provide stable straight edge to pocket where the Flap meets the ceiling.

Once installed, Horizontal Plaster Skim Trim can be plastered to create seamless finish.

Cover Flap profiles to close channel once shade is fitted.
Additional 12mm (UK /EURO Spec) or 1/2" (US Spec) MDF or similar material can be added to the flap to better match finish of the ceiling and provide flexibility of flap size, minimizing hembar aperture.

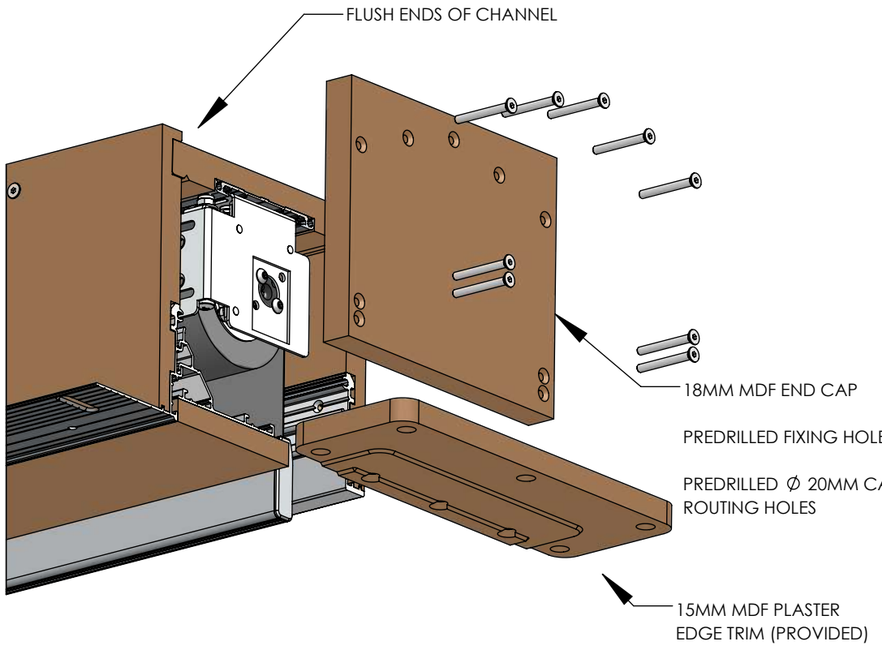

75mm (3") and 100mm (4") versions of UK / EURO and US Flaps are available to best suit installation.
