CLAMPING SLIDE KNUCKLES FOR PS BRACKETS

Shown on PS55 Bracket

View taken of Bottom Clamping Slide Knuckle

SCALE 2 : 3

The Clamping Slide Knuckle is an upgrade for PS models, replacing the standard Slide Knuckle. The Clamping Slide Knuckle allows for swivel adjustment about the pivot shaft by tightening the bolts held within the clamps, and can be set at the users discretion.

Tightening the top Clamping Slide Knuckle, will limit the amount of swivelling of the mount. Tightening the bottom Clamping Slide Knuckle will also limit the swivel, but will predominantly limit the ease of extension of the bracket.

For instructions on how to install Clamping Slide Knuckles, please refer to the PS-SLIDE CLAMP INSTRUCTIONS.
