UCH-SPT
UNICHANNEL SHADE POCKET TRIM KIT

The UniChannel Horizontal Plaster Skim Trim can be used as a standalone product to allow contractors to create plasterboard / Gyproc recess channels on site without the Full UniChannel Recess.

This maintains the Plaster Skim details, Dual Height hook on Flap and levelling / joining details for long runs.

To add more functionality and flexibility to the install, the UCH Mount Bracket Rail can also be purchased separately to allow for use of the Toolless Twist in brackets available.

UCH-SPT
UNICHANNEL SHADE POCKET TRIM KIT

Pre-made wood / plaster / Gyproc recess / channel made on site by contractors to client specification.
SPT - Shade Pocket Trim can be installed before plastering / painting to provide neat, straight edge.

Additional fixings along top edge of profile provide strength to support plaster trim / flap hanger for heavier flap materials.

UCH Horizontal Skim Trim provides plaster skim edge detail as well as dual position hook on flap in one product allowing for a quick way to create a seamless finish from ceiling to pocket.

Fixings from below through Aluminium Horizontal Skim Slotted holes allow for perfect alignment to ceiling without need for removing and realigning.
Combination of Aluminium and MDF provide stable straight edge to pocket where the Flap meets the ceiling.

Once installed, Horizontal Plaster Skim Trim can be plastered to create seamless finish.

Cover Flap profiles to close channel once shade is fitted.
Additional 12mm (UK /EURO Spec) or 1/2" (US Spec) MDF or similar material can be added to the flap to better match finish of the ceiling and provide flexibility of flap size, minimizing hembar aperture.

75mm (3") and 100mm (4") versions of UK / EURO and US Flaps are available to best suit installation.
