SERVICE BRACKET LOCK

Both Pull to Release Service Bracket Cords must be pulled vertically down to release the spring loaded catches and allow the Mirror TV to be pulled away from the wall.

BOTH CORDS MUST BE ACCESSIBLE AT ALL TIMES

4 x Adjustable buffers provide stability for the screen corners. These are mounted inside the wall box and should be adjusted to the back of the screen.

SCREEN ADJUSTMENT

The angle of the screen can be fine tuned to horizontal by adjusting the 2 POZI bolts on top of the screen frame. Wall Box hidden for clarity.

ADDITIONAL ACCESSORIES

For Screens with a 600x400 VESA Pattern the AP-H600 Adapter Plate is required to increase the available mounting width.

Please Note the AP-H600 adapter plate offsets the rear of the screen an additional 4mm away from the wall.
